PROPOSAL ABSTRACT:

Aim and detailed description of the course (extend space for writing - no less than one page, no more than two).

Poster /workshop:

A time slot on the first or second day for a short "poster/workshop" session might be included, in which the participants are invited to introduce themselves and to present their current research project.

The course is addressed to (*kinds of attendees particularly expected: doctoral students, young researcher, senior researchers, practicing engineers, technologists, others*):

Publication and dissemination

All lectures could be recorded together with the presentation slides. These recordings will be used by CISM for dissemination purposes.

In addition, CISM aims to publish a bound volume containing the proceedings of the course. This volume will appear in the series of CISM books "Courses and Lectures" published and distributed by Springer.

Therefore, the course coordinators are kindly requested to take the role of book editor and all lecturers are kindly requested to publish the lecture notes, possibly revised and expanded, in the book.

Do you accept the commitments of being editor? Yes No
